

# "SYNTHETIC NATURES": ARCHI-TECTONICS' RESEARCH ON DISPLAY IN MILAN

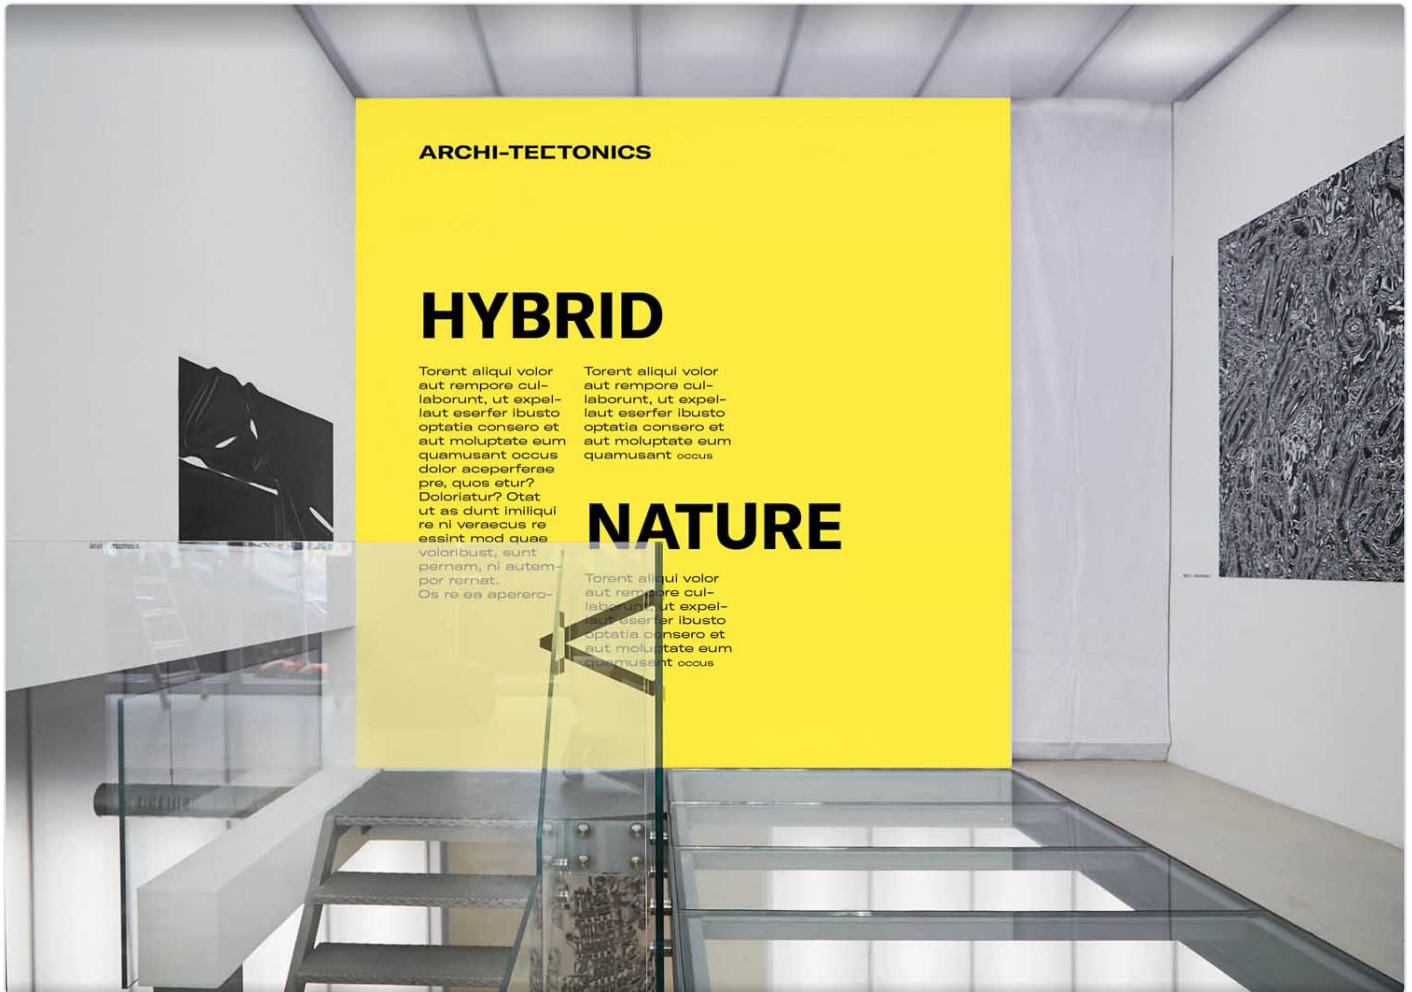

HOSTED AT SPAZIO MILESI FROM MARCH 11 TO 29, THE EXHIBITION EXPLORES THE FUSION OF SYNTHETIC AND NATURAL SYSTEMS, ENVISIONING THE BUILT ENVIRONMENT AS A DYNAMIC, BIO-INTEGRATED ECOSYSTEM

By **Editorial Staff** - 3 March 2025

The *Synthetic Natures* exhibition will be inaugurated on Tuesday, March 11, at 6 PM, at **Spazio Milesi** in **Milan**. The exhibition presents the latest **design-research project** by the architecture firm **Archi-Tectonics**, founded in 1994 by **Winka Dubbeldam** and headquartered in New York City.

**Open to visitors until March 29**, the exhibition explores the fusion of **synthetic and natural systems**, envisioning the built environment as **a dynamic, bio-integrated ecosystem**. Addressing the challenges of the **Anthropocene**, *Synthetic Natures* investigates hybrid materials and responsive design strategies that dissolve the boundaries between architecture and organic life, shaping **adaptive and resilient urban landscapes**.

The *Synthetic Natures* research project reflects Archi-Tectonics' commitment to **generative design** and highlights the firm's innovative approach to **hybrid architecture**. The exhibition also features *Strange Objects, New Solids, and Massive Things*, the latest publication by Archi-Tectonics, which takes readers on an immersive journey through the studio's experimental methodology.
